Projects

FRAUDULENT REVIEW

Developed an algorithm to detect fraudulent reviews in mobile apps. Utilized data mining and sentiment analysis techniques. Successfully identified fraudulent sessions, enhancing app store integrity.

FACIAL EMOTION DETECTION

Implemented a machine learning-based approach to detect the emotion of a person. The emotion of the person is exactly detected using facial coordinates where K-nearest neighbour algorithm, Support vector machine and Hidden Markov Model. Here Hidden Markov Model finds the hidden structure in the data. The exact percentage of the emotion of a person is detected in this model.
